Subject: FW: followup on 2006 PM2.5 options from our call last week

Hi Sylvia, Carol, and Scott –

As you may recall, Phil had asked for the planning scenarios and a timeline in writing last week, so this is what we transmitted yesterday. It should all look familiar to you from our call last week, except that Jeanhee clarified the information in the final bullet on MSM and 189(d) after the call.

We may talk briefly about the 189(d) requirements on this afternoon's call about the 2012 PM2.5 plan.

Thanks -
Wienke

Hi Phil,
See below as follow up to our conversations last week.
Please let us know if you have any questions.
Best,
Amy

Subject: followup on 2006 PM2.5 options from our call last week

Hi Zorik –

On the call last week, Phil asked for us to put the planning scenarios and a timeline in writing to you. Here you go. Let us know if you have any questions. I'll work on scheduling a follow up call in the coming weeks.

Thanks
Wienke

Important dates for South Coast PM2.5 nonattainment area (2006 24-hour PM2.5 NAAQS):

- Applicable attainment date for 2006 PM2.5 NAAQS: December 31, 2019
- Deadline for extension request under CAA section 188(e): October 31, 2019 (see 40 CFR 51.1005(b)(6)).
- Deadline for EPA determination concerning attainment of 2006 PM2.5 NAAQS: June 30, 2020 (see CAA section 179(c)).
- Deadline for CAA section 189(d) plan, if South Coast fails to attain 2006 PM2.5 NAAQS: December 31, 2020 (see CAA section 189(d)).

Options:

1. Section 188(e) extension request:

- State must submit SIP revision meeting requirements of section 188(e) by October 31, 2019
- Under section 188(e), State must:
 - apply for extension of attainment date beyond statutory attainment date (at most 5 years);
 - demonstrate that attainment by statutory attainment date is impracticable;
 - demonstrate that it has complied with all requirements and commitments pertaining to the area in the implementation plan;
 - demonstrate to the satisfaction of the Administrator that the plan for the area includes the "most stringent measures" included in any SIP or achieved in practice in any state that can feasibly be implemented in the area; and
 - submit a demonstration of attainment by the most expeditious alternative date practicable.
- EPA cannot grant extension after June 30, 2020.

2. Determination of attainment by attainment date / Determination of failure to attain:

- EPA must determine by June 30, 2020 whether South Coast area has attained 2006 PM2.5 NAAQS.
- If EPA determines area has failed to attain the NAAQS, CARB would be required to submit, within 12 months after the attainment date (i.e., by December 31, 2020), SIP revisions meeting requirements of CAA section 189(d), including a 5% plan.
- MSM is not required for an area that has not previously received an attainment date extension under 188(e).
